

Project Narrative – anc1D 2008 Small Grants

Title: In 15 words or less, give a title that describes the project's main beneficial result.

Self-Sufficiency & Urban Gardening in Mt Pleasant

Narrative: 500 words or less, all on this page. Label paragraphs - A: Group. B: Project. C: Benefits. D: Leverage.

The purpose is to train participants from the Mt. Pleasant community in soil analysis and ecology relevant to urban gardening, and to learn the legal requirements (e.g. permits, etc) to set up community gardens in the Mt. Pleasant community. Training will include familiarity with the permit process and the identification of possible sites for community gardens. Soil analysis skills will be shared for matching the best crops with the location for each garden. This is a great project to get people to learn about the availability of unused community space for public education and enrichment!
